

SOIL HEALTH FIELD DAY : Friday August 10th

10 a.m. - 12:30 p.m.

Incorporated Inter-seeding

TOURS

- ◆ **Nitrogen Trial Results** - Results of 3 years of on farm nitrogen trails from Southeast Minnesota, and insights into how farmers might maintain yields while reducing nitrogen management costs.
- ◆ **Inter-seeding in Corn** - Seeding mixes, methods - successes and failures. Herbicide and weed control. View inter-seeded plots with various seeding rates and incorporation.
- ◆ **Soil Health and Weed Control** - Successful weed control while using diverse covers. Many producers are seeing a reduction in weed control costs after introducing cover crops. Learn how.
- ◆ **Livestock and Cover Crops** - View grazing and forage crops designed for producers interested in getting the most of their land and benefiting their livestock herd.
