

Thinking of going solar but not sure where to start?

 **SOLAR UNITED NEIGHBORS**

**LAND  
STEWARDSHIP  
PROJECT**

## **Learn about going solar with Solar United Neighbors (SUN) and the Land Stewardship Project (LSP)**

SUN's Driftless Area Solar Co-op was created to help homeowners, farmers, and small business owners go solar. The co-op is simply a group of people who work together to get the best price from an installer, share and support each other in the process of going solar, and tap into the expertise at Solar United Neighbors.

### **Join us for a webinar and conference call:**

#### **Going Solar 101 and Driftless Area Solar Co-op**

*Wed., May 13 from 6:30 to 8:00 p.m.*

Learn about going solar—the technology, economic benefits and how we work together to save you money. You'll be able to ask questions alongside other folks in the area who want to go solar.

#### **Solar Financing and Grants for Farms and Small Businesses**

*Tues., May 19 from 6:30 to 8:00 p.m.*

Learn about the USDA Rural Energy for America Program (REAP), Property Assessed Clean Energy (PACE) financing and other considerations when taking your farm or small business solar.
